

Fixing rings and washers DIN-6319

Concave and convex washers DIN-6319

- AISI-303 stainless steel.

DIN 6319-NI washers are used to fix machined parts with surfaces that are not parallel.

The high degree of corrosion resistance of AISI-303 stainless steel makes these elements especially suitable for medical machinery and equipment for the food and pharmaceutical industries.

[Access to Autocad 2D and 3D catalogs and libraries](#)

DIN-705 fixing rings

- AISI-303 stainless steel.
- DIN 553 pressure screw.

The high degree of corrosion resistance of AISI-303 stainless steel makes these elements especially suitable for medical machinery and equipment for the food and pharmaceutical industries.

[Access to Autocad 2D and 3D catalogs and libraries](#)

Fixing rings GN 707

- AISI-303 stainless steel.

The high degree of corrosion resistance of AISI-303 stainless steel makes these elements especially suitable for medical machinery and equipment for the food and pharmaceutical industries.

[Access to Autocad 2D and 3D catalogs and libraries](#)

Fixing rings GN 706

- AISI-303 stainless steel.

The high degree of corrosion resistance of AISI-303 stainless steel makes these elements especially suitable for medical machinery and equipment for the food and pharmaceutical industries.
