

## Fastening elements with vertical bracket

### Applications

Stainless steel fasteners are resistant to corrosion and aggressive chemicals. Articulated lever elements in stainless steel version are preferably used in devices in the chemical and food industries.

### Characteristics

- Steel resistant to corrosion and high temperatures.
- Smooth and burr-free surfaces through electric polishing.
- Ergonomically shaped plastic handle resistant to solvents, oils, greases and other chemical agents.

### Models

- 324-SS 82 mm long force 1600 (N) [Access to catalogs](#)
- 334-SS 104 mm long force 3200 (N) [Access to catalogs](#)
- 344-SS 137 mm long force 7000 (N) [Access to catalogs](#)
