

ESAB Eco-Arc II DISPLAY

Available in three types of folding front, the screen also includes the new Eco head support with 5 angular adjustments.

The screen is supplied complete with external protective lens, Din 11 glass and internal protective lens.

Efficient head support

Features and Benefits

Full frontal protection – Protects the face, chin, neck and ears by providing less exposure of the parts in any welding position.

Lightweight Poly Propylene screen – The screen weighs 205g. Its low weight increases the welder's comfort and reduces fatigue. The entire screen weighs 484g, making it one of the lightest on the market.

New Eco head support – Made of robust Nylon, the head support is very light and durable. The anti-sweat band adds comfort to the welder. There are 5 angular adjustments allowing a perfect fit of the face to the screen.

Anti-projection lens - EN 116 S
