

Rebel Esab EMP 215i MIG MMA LIFT TIG 120/230V

Rebel™ Series welding equipment offers the flexibility of 120/230V and some of the most innovative welding technologies available. With a cutting-edge design inspired by welding professionals, the Rebel is a complete package suitable for welding any material—carbon steel, aluminum, stainless steel—anywhere.

You can choose between two models:

Rebel EMP 215ic for MIG/MMA/Lift TIG

Characteristics

- True multi-process performance for the best MIG, Stick, MMA (even demanding electrodes) welding; and Lift TIG with Rebel EMP 215ic.
- The unique sMIG ("smart MIG") function continually learns and adapts to the professional's welding technique to deliver a stable arc and exceptional repeatable welds, increasing the productivity of experienced welders and reducing training time for beginners.
- An innovative user interface with a large TFT display allows welding parameters and settings to be clearly displayed, even from a distance. The screen incorporates exclusive functions in various languages: it allows you to consult the user manual and reference spare parts.
- Exclusive industrial design with a five-grip handle safety frame and a unibody steel frame in a lightweight, highly portable unit; includes a three-year warranty as standard.
- The Rebel EMP 215ic is supplied ready to weld with an ESAB MXL 200 MIG professional torch with scart, electrode and return cable sets, 0.8 mm Aristorod 12.50 OK thread on 200 mm spool, 4.5 gas hose m with quick connection to the machine, contact tips and feed rollers for threads between 0.6 and 1.0 mm.

Industries

- Agricultural Equipment
- Automotive
- Automotive Bodies
- Civil Construction
- HVAC
- Light Fabrication
- Repair and Maintenance
- Transportation

Welding process

- Welding-GMAW (MIG/MAG - Metal Inert Gas / Metal Active Gas)
- Welding-GTAW (TIG - Tungsten Inert Gas)
- Welding-SMAW/MMA (Stick)
